 - ☞ Exclusion of this evaluation
 - Vehicles without Opera Window Glass
 - Vehicles with Opera Window Glass on Front Door

Vehicle with Opera Window Glass

Exclusion of this evaluation

Without Opera Window Glass

Opera Window Glass
on Door

Criteria

The Front Fender around the Opera Window Glass should be fixed to prevent the molding of the Opera Window Glass from being damaged by the Front Fender in a collision.

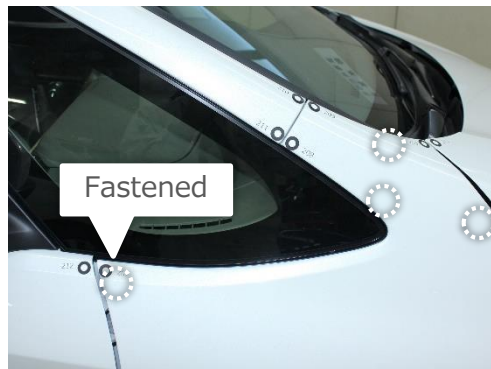

Fixing structure of the Front Fenders around the Opera Window Glass with bolts, etc.

Reason

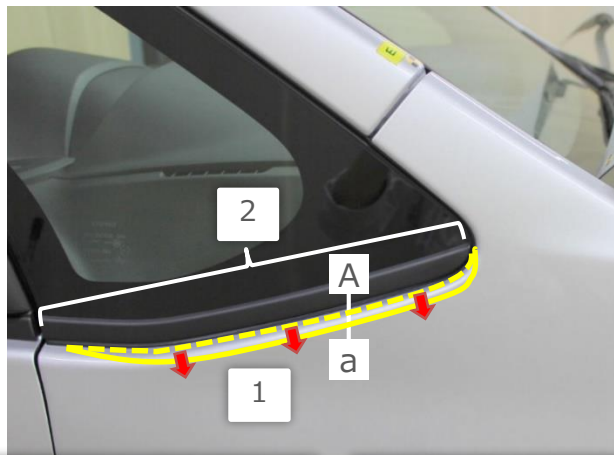

When the Front Fender around the Opera Window Glass is securely fixed, damage to the Opera Window Glass Lip caused by the Front Fender expanding outward in a collision can be prevented. This helps prevent replacement of the Opera Window Glass due to damage to the Lip of the Glass.

Good example of Front Fender fixation

Front Fender securely fixed, which helps prevent Front Fender from expanding

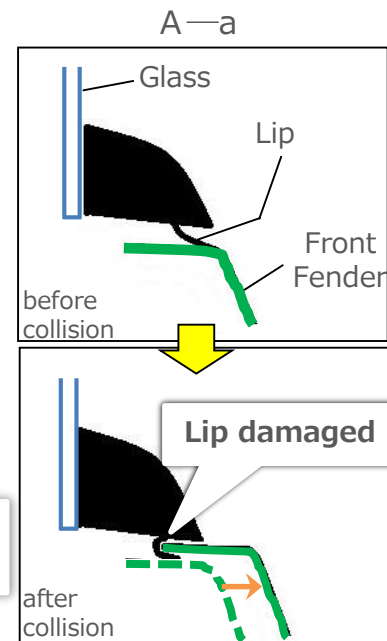

Poor example of Front Fender fixation

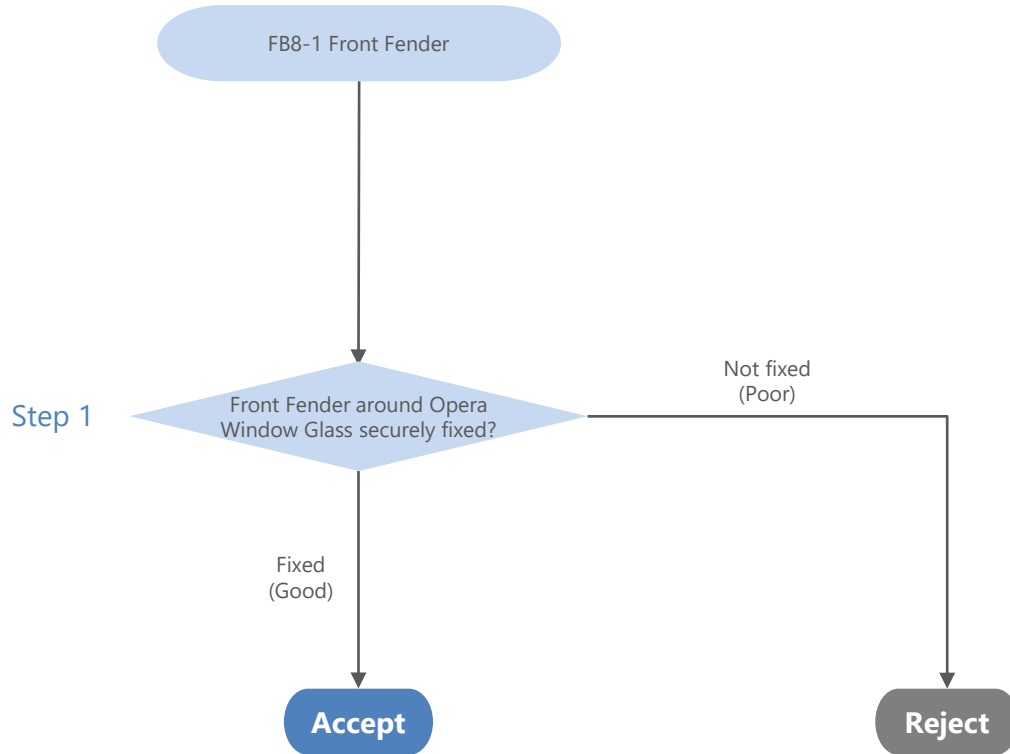

1. Front Fender expand outward in a collision,

2. Lip of Glass gets caught

Check Flow

Check – Step 1

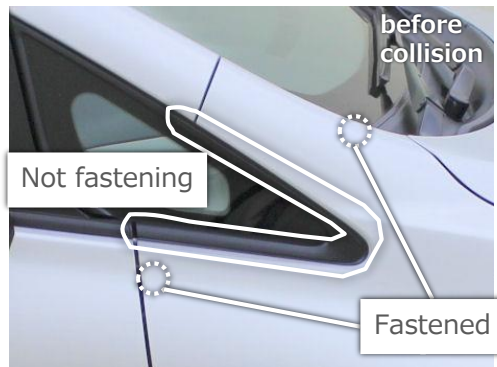

Check the actual vehicle or the repair manual to see if the Front Fender around the Opera Window Glass is securely fixed.

【Determination】

Good

☞ When the Fender around the Glass is securely fixed with bolts or clips, which helps prevent the Fender from expanding outward in a collision, it is determined Good and **Accept**

Poor

☞ When the Fender around the Glass is not securely fixed, which allows the Fender to expand outward in a collision, it is determined Poor and **Reject**
