

Inspection Criteria

The C/D pillar should be supplied as a sub-assembly or individually so that it can be replaced according to the degree of damage.

Reason

When the C/D pillar is supplied as a sub-assembly or individually, it can be replaced according to the degree of damage, which reduces the repair cost.

Good Example

The pillar parts are supplied individually.

Outer sub-assembly

Poor Example

The pillar parts are supplied only as a complete assembly

Only the rear inside panel assembly is supplied.
